

## NERDC in “Comexpo 2018” at BMICH

National Engineering Research and Development Center participated for the exhibition co-organized by Industrial Development Board. This was held at BMICH on 10<sup>th</sup> to 12<sup>th</sup> August 2018.

The stall located Hall C consisted of exhibits representing Agriculture Engineering & Machine Development and Civil Engineering sectors. The stall & the exhibits as well as technologies were admired by the visitors. Cost Effective Building Construction methods that are ecofriendly were attractive exhibits for the people who had interests to build their houses at affordable price. The video shows of

domestic as well as industrial bio gas models & biomass rice cooker which beats the current energy crisis drew special attention of house wives. More over the domestic model for virgin coconut oil extractor was highly appreciated by house wives whom concern about good health of their families.

Many of foreign visitors also were among the huge crowd who visited the exhibition. And this exhibition last for three consecutive days.
