

NERDC Reaches Kurunegala Mini Technology Exhibition

National Engineering Research and Development Center participated for the exhibition organized by Export Development Board. This was held at Kurunegala Blue Sky Grand Hotel on 17th August 2018.

The stall consisted of exhibits representing Agriculture Engineering & Machine Development sector.

The machinery developed by NERDC, which are most favorable for the small and medium entrepreneurs who are export oriented in their business. This exhibition was organized by EDB with the aim of establishing 2000 exporters by year 2020 programme.

The stall & the exhibits as well as technologies were admired by the visitors. The video shows of domestic as well as industrial bio gas models & biomass rice cooker which beats the current energy crisis drew special attention of house wives. More over the domestic model

for virgin coconut oil extractor was highly appreciated by house wives whom concern about good health of their families.
