

Work shop on Pre-cast Concrete Components

The first workshop on Pre-cast Concrete Components of the year was

held at Kulasinghe auditorium on 7th and 8th Feb 2018 at 8.45AM onwards in NERD Centre. This workshop was organized upon the request of World Vision Lanka office. Objective of this two day workshop was to train participants to manufacture concrete

door window frames to get their own homes done and to get started their own enterprises for catering future needs of these concrete components. Since the par

ticipants all together were 48 in number and comprised of Killinochchi, Mullaitivu and Batticaloa districts where new resettlement schemes have begun: training they received

through this workshop will be benefited in catering the requirements of establishing small scale entrepreneurs in manufacturing of concrete components. This two day work shop was a residential

work shop and theory sessions were undertaken by Eng. J.A.C. Chrisanthi, Eng. Nuwan Amaradasa, Eng. Wasantha Perepa, Mr. W.P.R.D. Weerasinghe, Mr. Sunil Karunawardene. The practical

sessions were taken over by Mr. A.D. A.R. Premawansa and Mr. Yasith Ranathunge.

Work shop started with an

innuaguaration ceremony & during the welcome speech, Deputy Director General (Services) of NERDC Eng. A.H. Piyasiri emphasized the

importance of having these kind of work shops to share the knowledge & experience of NERDC developed technologies specially geographical areas like North & East since those areas readily grab the development which is an essential part of development of this country. During the night there was entertainment and at the end

of work shop, closing ceremony followed up a valuable certificate awarded to participants, to encourage & support them to start up their own work shop.
